

Professional Showroom Display Systems

The Miller Group
MULTIPLEX
ST. LOUIS

★ **Showrooms around the world count on Multiplex displays from The Miller Group.**

Every showroom has its own sense of style...but good design is universal. That's why you'll find Multiplex displays in decorator showrooms throughout the United States and around the world.

For more than a century, our Multiplex Division has designed and manufactured displays to organize merchandise and multiply display space. Our broad selection of displays includes wall-mounted, floor and Multipost® installations for textiles, wallcoverings, floorcoverings, framed art and a variety of other items. We maintain inventory of the most popular products to help make changes to your lines as quickly as possible.

We've continued to expand our line of steel displays, developing the sizes and styles to best support your needs. Wood, plastic and wire now complement our standard capabilities...along with paint systems for powder-coating or baked enamel finishes. Browse through our catalog or visit our website for a tour of our standard display systems. Remember, this is only our standard line; we have many special order products available, too. And, for those very special circumstances, we can design and manufacture custom displays tailored for your showroom.

Fabric Applications

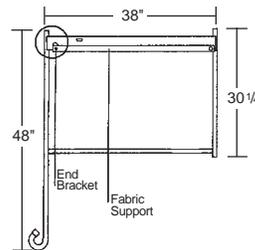

★ Fabric Arms

Ideal for showing long lengths of fabric, from heavy banners to lightweight sheers. Also great for showing complementary patterns or colors stitched together to form one long banner, or combine two smaller widths on the same bar for side-by-side display. Sturdy steel arm available in two construction styles in an assortment of sizes and metal finishes. Each provides:

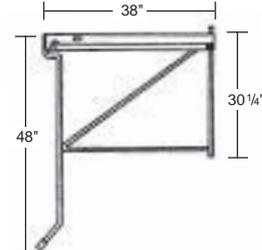

- Handle to easily turn arms without damage to merchandise
- Dual display surfaces on each arm
- Plastic separators at top of each arm to prevent adjacent arms from touching
- Metal strap for hanging the hemmed edge of your sample
- 30.25" pivot length
- Standard orders in packages of ten

D-384 TOF
Steel round tubing construction (TOF). Spacing 2" on center; 3/4" diameter pivot hole.

W-384 ROF
Thinner, 3/8" wire construction (ROF). Spacing 1.5" on center; 7/16" diameter pivot hole.

★ Fabric Flats or Wings

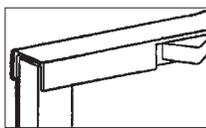

Steel, rectangular frames with white tackboard inserts are a staple for displaying a large assortment of fabric samples. This system offers the flexibility to display one large sample, composite of smaller samples or any combination. Simply stapling samples to the insert board allows quick,

easy updates. Select from three construction styles, each welded to form a sturdy, one piece wing, with plastic separators to keep adjacent wings from touching. Several standard sizes in six standard colors. Special finishes available.

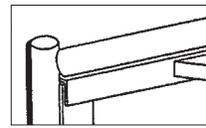

RCR- Rod & Channel, Reinforced
• 3/8" steel channel
• Steel rod welded around outer edge

- for increased strength and durability
- Spacing 2" on center
 - 7/16" diameter pivot hole

COT-Channel Only with Cap
• 3/8" steel channels
• Steel cap across top wing

- Spacing 2" on center
- 7/16" diameter pivot hole

TCR-Tube & Channel, Reinforced
• 7/16" steel channel
• Strong, durable tubing frame for

- larger, heavy samples
- Spacing 2" on center
 - 3/4" diameter pivot hole

	AKA	Size (wxh)	Handle	Model Description	Construction Style	Insert Board	Part No.	Pivot Size	Pivot Hole Diameter	Typical Spacing

	56" x 72"	N/A	5672 TCR	TCR	1/4"	175294	0.706	3/4"	2"	

*Stocking program—white metal finish. Other standard colors—black, décor white, light gray, charcoal, beige. Special colors available—fee may apply. See signage clips on page 6S.

Wallcovering and Trim Applications

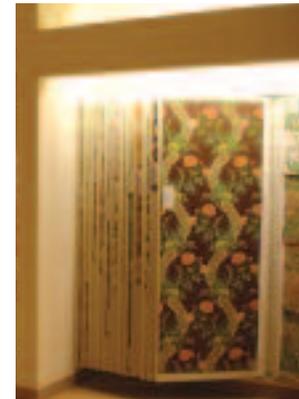

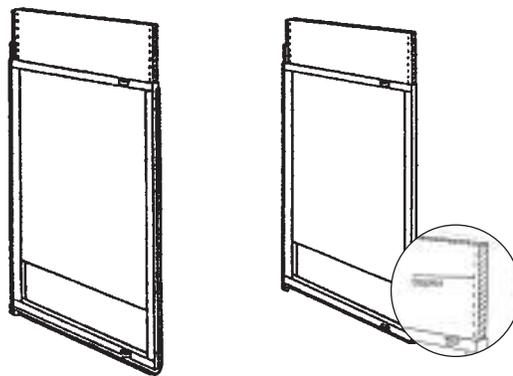

On the wall or in a floor installation, our Multiplex Wallcovering Wings make an attractive and easy-to-use showcase for your samples. Dual-sided wing provides a page-by-page presentation of your lines, encouraging browsing by your clients. Add the Multiplex Signage Clip (see page 6S) for your quick reference.

Each rectangular frame is composed of steel, welded to form a one-piece wing...creating a display tool that can be used repeatedly. The plastic separators included on each wing prevent adjacent wings from touching. All wings include a 1/4" insert board that was designed specifically

for this application. These wings are top-loading, allowing the filler board to be easily removed and reinserted. (Replacement boards available – see page 6S.) Wallpaper paste or staples may be used for attaching samples.

Then for your smaller treasures, like trim and tassels, Multiplex offers wings in smaller sizes with the same construction styles. Most of these wings also include insert boards. (See chart below.)

Select from a variety of sizes with different construction styles.

RCT- Rod & Channel Top-loading

- 3/8" steel channels with welded rod at bottom and front for enhanced strength
- Standard spacing: 1" on center

COT-Channel Only Top-loading

- 3/8" steel channels
- Standard spacing: 1" on center

Stocking program-white metal finish. Standard colors: white, black, décor white, charcoal, light gray, and beige.

* See signage clips page 6S.

★ Installation Support System

Multiplex wings are designed to fit into steel angle iron (AKA main frames, pivot bars, rails, #19) hardware. These bars consist of a top and bottom rail, punched with a specific size pivot hole at a specified spacing. Each wing *must* be coordinated to the matching pivot hole size. Fabric and wallcovering installations utilize the lighter gauge 2" x 2" rails. Each style includes installation instructions and hardware.

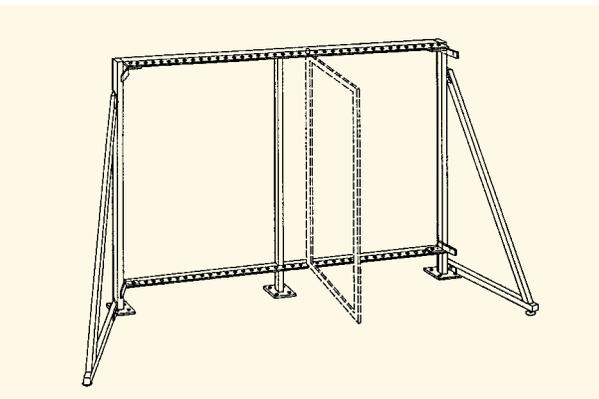

The Miller Group makes it easy! Select the installation system that best fits your situation.

- **Wall-mounted systems** are the most popular. In any given space, a wall system will accommodate more wings than a floor system, providing more display opportunities. *Load-bearing walls are mandatory.*
- **Floor models** utilize the pivot bars of a wall installation with the addition of support legs to provide a freestanding installation. Bolting to the floor is recommended.
- **Multipost®** provides the look of a wall installation; it's the perfect alternative when load-bearing walls are not available. (See page 6S.)

IMPORTANT! Have your architect, contractor or structural engineer certify your structural load-bearing wall.

Freestanding Main Frames

These all-steel, self-supportable systems assemble easily and accommodate most Multiplex wings. Select from single- or double-sided models. Placed against a wall or across a corner, they make an attractive display. Set in an open area, they create a special display island, particularly using the double-sided model. Standard maximum overall width of 16'; any standard spacing and pivot hole size available. Overall height may be adjusted to your requirements. Custom production requires assistance from a Showroom Specialist.

Stocking Program

This program (QS19) offers main frames in standard cut lengths that may be butted together or cut down in field to allow you to build the perfect length of wall rail. Regardless of spacing, each rail is drilled to sustain the spacing when fitted to a second rail. One set of adjustable end stops is required per run/bay. These fit into the pivot hole of your end wings, between the rail and the wing. End stops are designed to maintain the proper angle of viewing for the end wings.

Pivot Hole (dia)	Pivot Size	Length	Pivot Spacing (dia)	No. Pivot Holes	Part No.	Typically Accommodate
3/4"	0.706	48"	2"	24	176784	D-384 Fabric

5/16"	0.25	176965

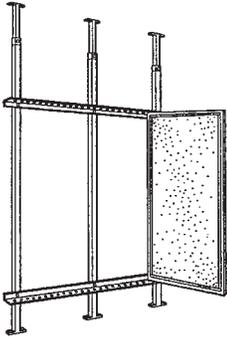

Stocking Color: white. Upcharge and extended lead time applicable to other colors.

Custom Wall Main Frames

In lieu of our Stocking Program, custom rails may be produced to a specific length for your application to accommodate any quantity of wings. The pivot bar length is equal to the number of wings minus one, multiplied by the spacing, plus 3", which accommodates the end stops. Measure location; allow 2/3 width of wing at each end to provide 90-degree angle of opening. Please allow sufficient lead time for engineering drawings and production time. Contact our Showroom Specialist.

Multiposts® and Accessories

When load-bearing walls are not an option, then floor-to-ceiling Multiposts create a dramatic, permanently positioned display. Place against a non-structural wall, in an open area or across a corner. Multiposts use telescoping steel tubing that can be raised or lowered 6" to adjust to your exact ceiling height for a display that perfectly fits your space. The pivot bars attach to the Multiposts, allowing wing banks throughout your showroom. Supplemental angle braces are also available. Be sure to consult your architect, engineer or contractor to confirm your floor and ceiling will support the weight. The number of the posts is determined by the ceiling height, wing size and spacing. Contact your Multiplex Showroom specialist for assistance.

Attach Main Frames (sold on page 5S) to Multiposts for a secure display of swinging wings.

The Finishing Touch...

★ Signage Clips

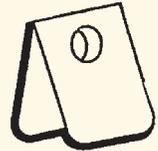

Acrylic, reusable Signage Clips quickly identify new products or key lines. Just slip your personalized message into the clear 4" x 5" sign holder and slip into white plastic gripper. Gripper firmly attaches to front channel of wings. Stay-put grip keeps clips from slipping. Clips accommodate D-384 style fabric arms (large) and fabric and wallcovering wings (small). Not available for W-384 or larger wings. 25 per carton.

Large - #193648 Small - #193649

★ Fabritabs

Fabritabs permit easy removal of loaner samples. Simply staple to upper corners of fabric samples, then hang from pegboard hooks. Package of 1,000. #130494

★ Steel Pegboard Hooks

1/8" hooks with flattened ends to hold merchandise close to display surface. Package of 100. #114944

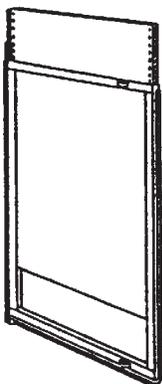

★ Nylon Pegboard Hooks

For use with pegboard wings to hang permanent and loaner fabric samples. 1/8" hooks have flattened ends to hold merchandise close to display surface. Package of 100. #119415

★ Filler Boards

Replacement inserts for wings. 12" x 36" boards are 1/8" thick; all others are 1/4" thick. Boards sold individually; shipped palletized.

Specialty Systems

✧ *Portable Color Rack*

Flexibility is the key with this ultimate fabric rack. This two-tier model easily expands to three tiers. Use as a single unit or lock ends together for expanded presentation. Inset casters for portability then lock for stability. Finally, the rack easily collapses for storage.

Specifications:

*Overall dimensions: 72" W x 90" H (fully expanded)
1" rods, spaced 30" apart, support 75lbs. each.*

#212103

✧ *Trim Kiosk*

No wall space? Then put a Multiplex Trim Kiosk to work for you! Your clients will love the simplicity of shopping your trim collection with this spinning kiosk. With a footprint of only 2.5 square feet, this 84" high floor model can easily be placed throughout your showroom. The 19" square, black base elevates your trims for comfortable browsing. Four display areas are covered with linen fabric, accepting tee-pins. Metal parts are white powder-coated finish.

Specifications:

Spinner: 15" W x 15" H

Viewable Area: 12 1/8" W x 61 7/8" H

Overall Dimensions:

83 1/2" H x 19" W x 19" D

#243189

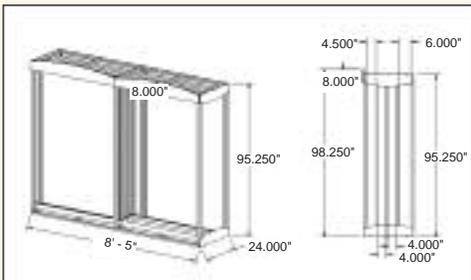

✧ Sliding Panel Systems

An attractive, innovative showcase for your framed art and mirrors, our exclusive Sliding Panel System gives you the power to display a large amount of merchandise in a limited amount of space.

This amazing unit is a mere two feet deep, yet provides up to 336 square feet of display area. Each panel measures 4' W x 7' H, allowing you to hang numerous or large display pieces. Panels slide quietly from one side of the display to the other, enabling customers to easily browse through inventory. Stationary rear panels stretch the length of the unit, making this system ideal for displaying oversized items. The back of the unit can even be used for additional display space.

For heavier merchandise, our durable pegboard panel system is ideal. The pegboard system uses steel hooks with flattened ends that enable your merchandise to hang close to the display surface, where it's most secure. For lightweight materials, you may prefer our loop fabric panels. These panels allow you to attach or reposition merchandise with ease using hook tab circles or hook tape.

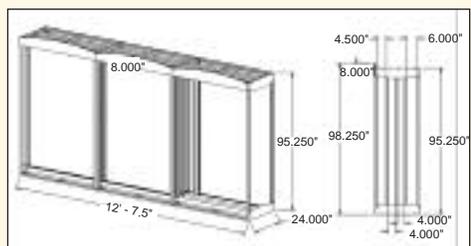

The basic construction of our pegboard and loop fabric displays is the same. Both are housed within a sturdy metal framework with panels strategically spaced to prevent merchandise from being "bumped" as users move the panels back and forth. Plus, each system is available in two sizes—three sliding panels or six sliding panels—so you can choose the model that best fits your needs and your space. All in an attractive black finish with black pegboard or fabric.

✧ 8' Sliding Panel System

Features three sliding panels with two stationary back panels. Yields 140-196 square feet* of display space, while using only 17 square feet of floor space.

#SL-47-8F Pegboard #242712 Fabric #242744

✧ 12' Sliding Panel System

Features six sliding panels with three stationary back panels. Yields 252-336 square feet* of display space, using less than 26 square feet of floor space.

#SL-47-12F Pegboard #242713 Fabric #242749

*Larger area measured using both sides of stationary panels.

Use our versatile Sliding Panel System alone, or create an attractive island display by positioning two units back to back.

Hook Tab Circles

5/8" diameter circles with pressure-sensitive adhesive backing for loop fabric. Package of 200. #142816

Hook Tape

1" wide tape backed with pressure-sensitive adhesive for loop fabric. Available in 25-yard rolls or linear yardage (5-yard minimum). #131393

Steel Pegboard Hooks

1/8" steel hooks with flattened ends to hold merchandise close to the display surface. Package of 100. #114944

★ *Swinging Panel Pegboard Displays for Framed Artwork and Decorative Mirrors*

The perfect solution for displaying a large amount of merchandise when space is a premium! Each floor or wall display features 10 dual-sided panels, 48" W x 84" H, providing 560 square feet of display area!

- Maximize the selling potential of your showroom space.
- Place more merchandise on the selling floor from the stockroom.
- Encourage browsing of products as easily as turning pages in a book.

★ *Tower Kiosk Display*

Turn just a few square feet into a dynamic message center with our attractive Tower Kiosk. This 4-sided unit provides over 40 feet of display area for you to promote special offers and upcoming events or to distribute product literature. Choose blue or black loop fabric with light oak trim. Add extra touches with acrylic literature pockets and Velcro-like hook tab circles or tape. Includes four blank header areas to personalize with your message. Fully assembled.

Tower Kiosk Display—Blue Fabric
#211184

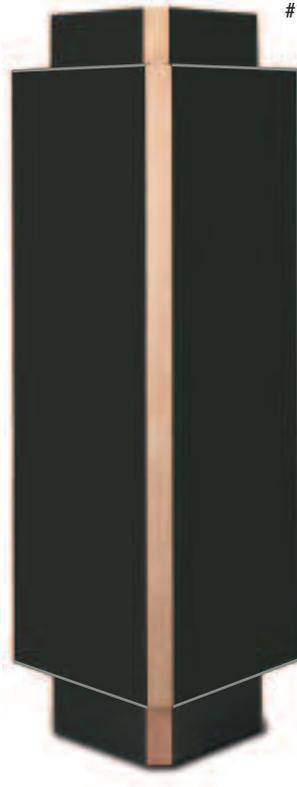

Tower Kiosk Display—Black Fabric
#211185

Specifications:

Panels: 20" W x 64" H

Header areas: 14" W x 6" H

Overall dimensions: 24" W x 78" H

All models include 100 steel pegboard hooks, flattened on ends, to hang merchandise securely against panels.

Two standard colors complement most decors: light gray metal with charcoal pegboard fillers or black metal with black pegboard fillers. To ensure your display fits your needs, your space and your décor, special order sizes, colors and other display surfaces (loop fabric, vinyl tackboard) are available. Contact a Multiplex expert for details.

Floor Display

Standard display measures 104" W x 90" H x 54" D.

#FS-47PP-10 Pegboard #182153

Wall Display

Standard display measures 122" W x 90" H x 51" D.

#WP-47PP-10 Pegboard #182155

Steel Pegboard Hooks

1/8" steel hooks with flattened ends to hold merchandise close to the display surface.

Package of 100. (Pictured page 8S.)

#114944

★ *Acrylic Literature Pockets*

Each pocket holds brochures, flyers or other materials up to 8 1/2" W x 11" H. Use insert divider to make two 4" wide pockets for smaller display items. Sold in sets of 12.

Includes 200 hook tab circles for easy mounting.

✧ Étagère Displays

Create special displays quickly and easily with our portable étagères. The bold, contemporary design assembles in seconds—no tools required! Just rotate the legs to open the powder-coated metal frame and insert the white MDF shelves. Folds flat for convenient storage.

Three-Shelf Étagère:

Features 16" shelves with 11 1/2" spacing. Overall measurements: 16" W x 49" H x 16" D.

#193899

Five-Shelf Étagère:

Features 21" shelves with 12 1/2" spacing. Overall measurements: 21" W x 76" H x 21" D.

#193900

✧ Portable Nesting Cubes

Perfect for special or temporary displays, our portable nesting cubes highlight your merchandise beautifully. Made of durable 3/4" laminated particle board, the cubes are finished inside and out for maximum versatility—show merchandise inside the cubes or turn the openings down to use as flat display surfaces. Reconfigure as your needs change, using all three cubes together or separately. Cubes nest together for easy storage. Assembly required.

Set of three includes one each:

- 23 1/2" Black Cube
- 17 1/2" Willow Gray Cube
- 11 1/2" Burgundy Cube

#194059

✧ Portable Display Panels

Promote upcoming events, post informational materials or highlight special offers—anywhere in your showroom—with these portable panels. The two-sided display surface comes in vinyl tackboard or attractive loop fabric for use with push pins, hook tab circles or hook tape. Choose pegboard for displaying heavier items with steel pegboard hooks. Heavy-duty casters make your display easy to move and can be locked in place for added security. Or remove the casters and use with sturdy support feet (included). Tubular steel frames.

Specifications:

Overall height: 80"

Display surface: 48" W x 66" H
